

E-commerce Sales & Profitability

Analyzing 2024-2025 data across 20 Indian cities.

E-commerce sales & profitability across Indian cities, 2024 - 2025

Indian trends

374%

of commerce sales and profits
in an average city in India

20 prominent Indian cities

123%

of total sales and profits
across the country

Project Overview

Objective

Identify high-margin regions, optimize discounting, understand payment preferences.

Scope

5,000 transactions from 20 Indian cities, 2024-2025.

Goal

Drive data-backed business growth.

Dataset Summary

- Total Records: 5,000 orders
- Timeline: 2024 – 2025
- Geographic Scope: 20 Cities, 4 Regions
- Product Range: 10 Categories, 50 Sub-Categories
- Key Features: Order, Financials, Customer, Transaction
- Data Quality: Clean, zero null values

Exploratory Data Analysis (EDA)

Initial exploration using Python for data distribution and health.

Data Loading

Pandas import.

Structural Check

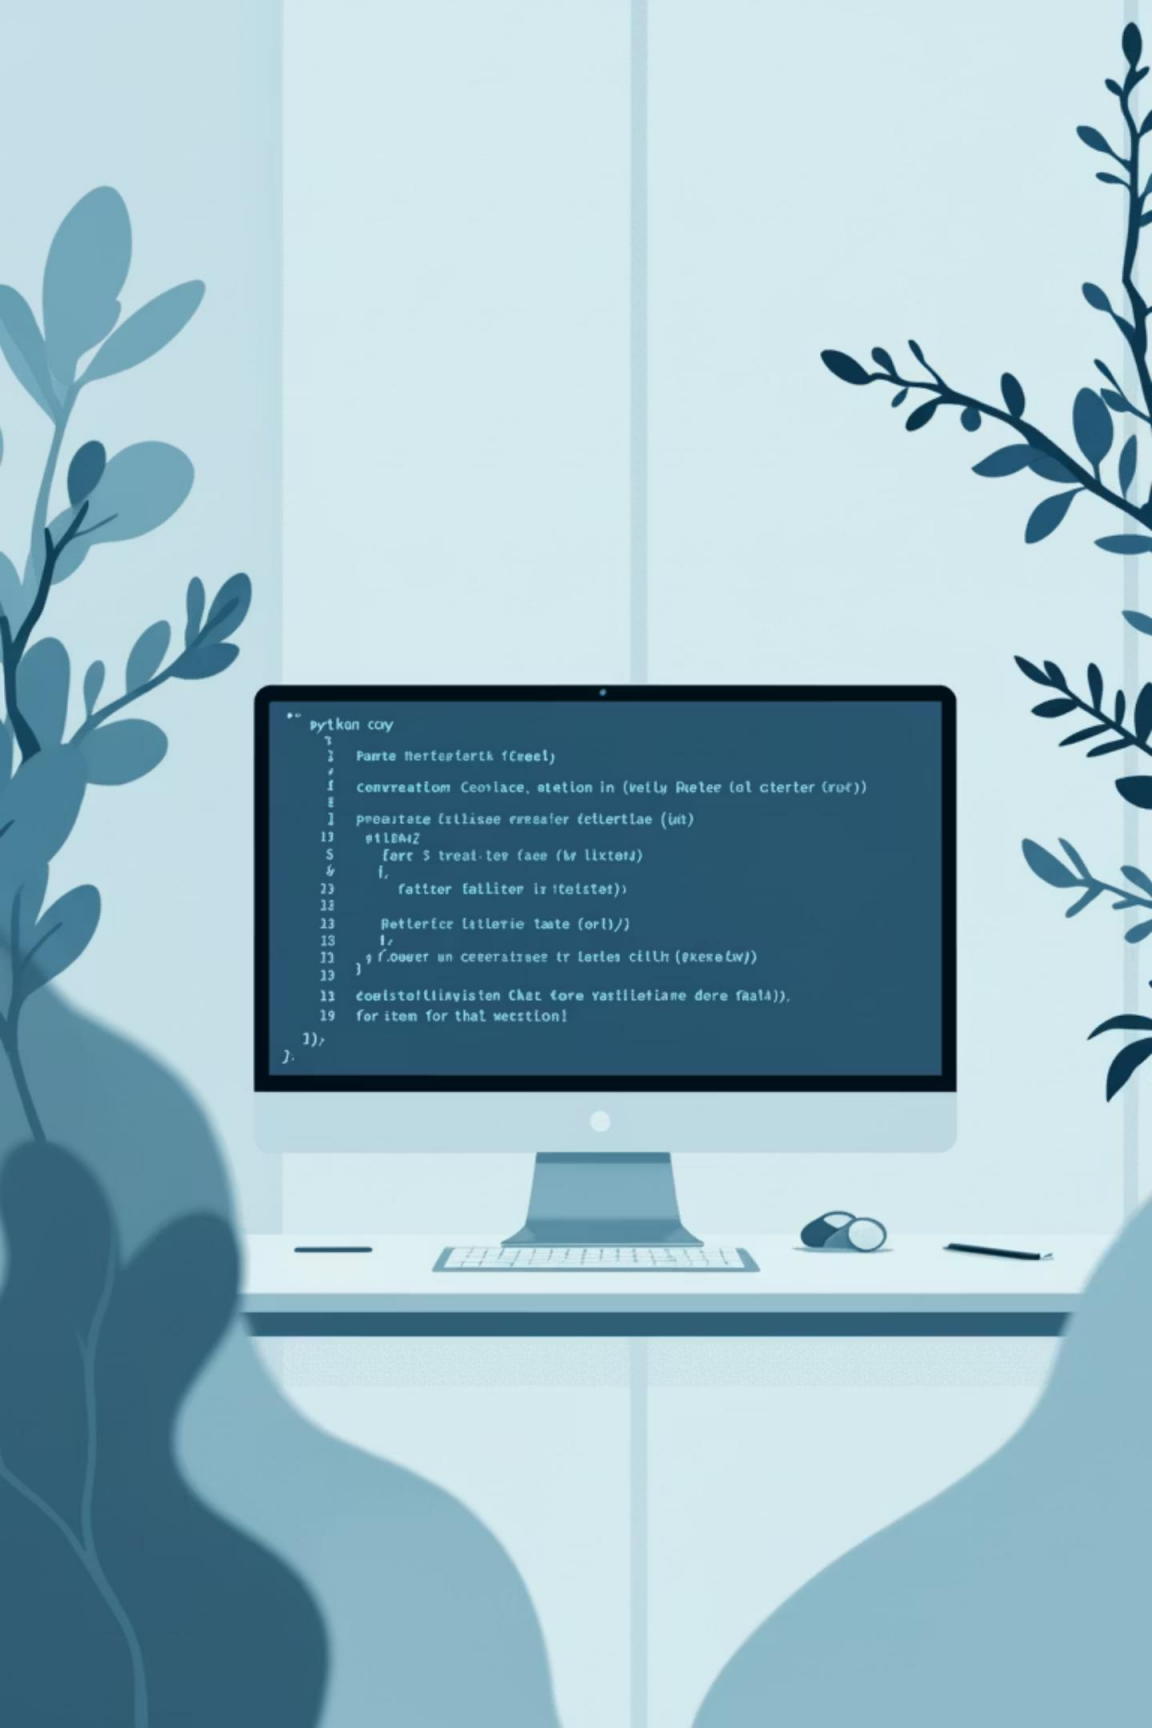

Data types confirmed.

Descriptive Stats

Key metrics found.

Null Values

Zero detected.

Top Profitable Cities

Cities ranked by total profit.

Lucknow	4523681
Guwahati	4487271
Bangalore	4416915
Chandigarh	4375380
Jaipur	4353578

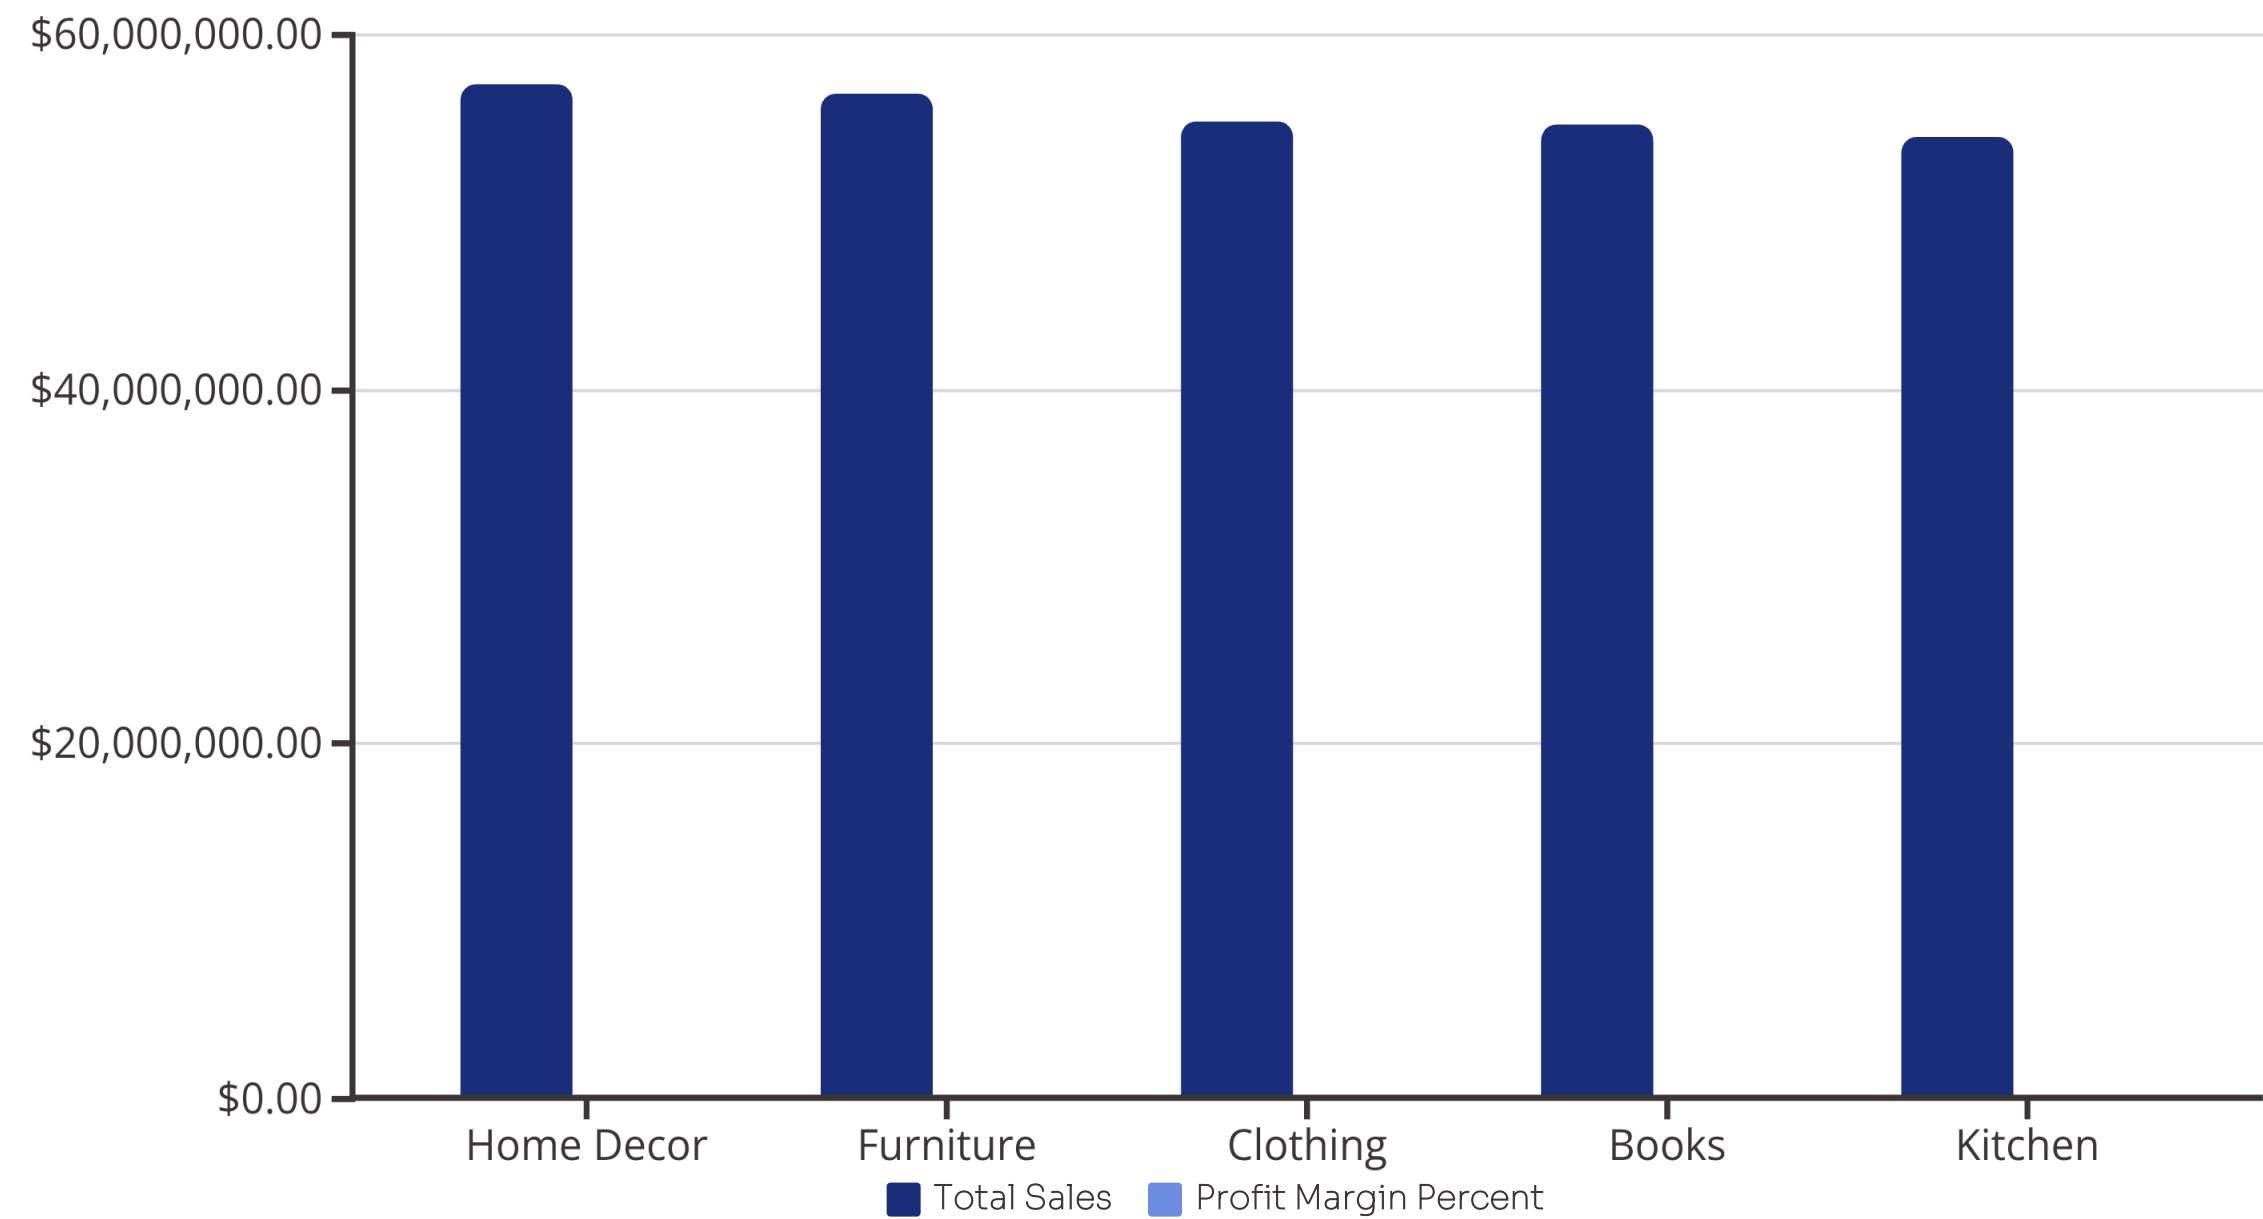

Discount Impact on Profit

Analyzing if high discounts erode margins.

Revenue vs. Profit by Category

Comparing total sales and profit margins across 10 categories.

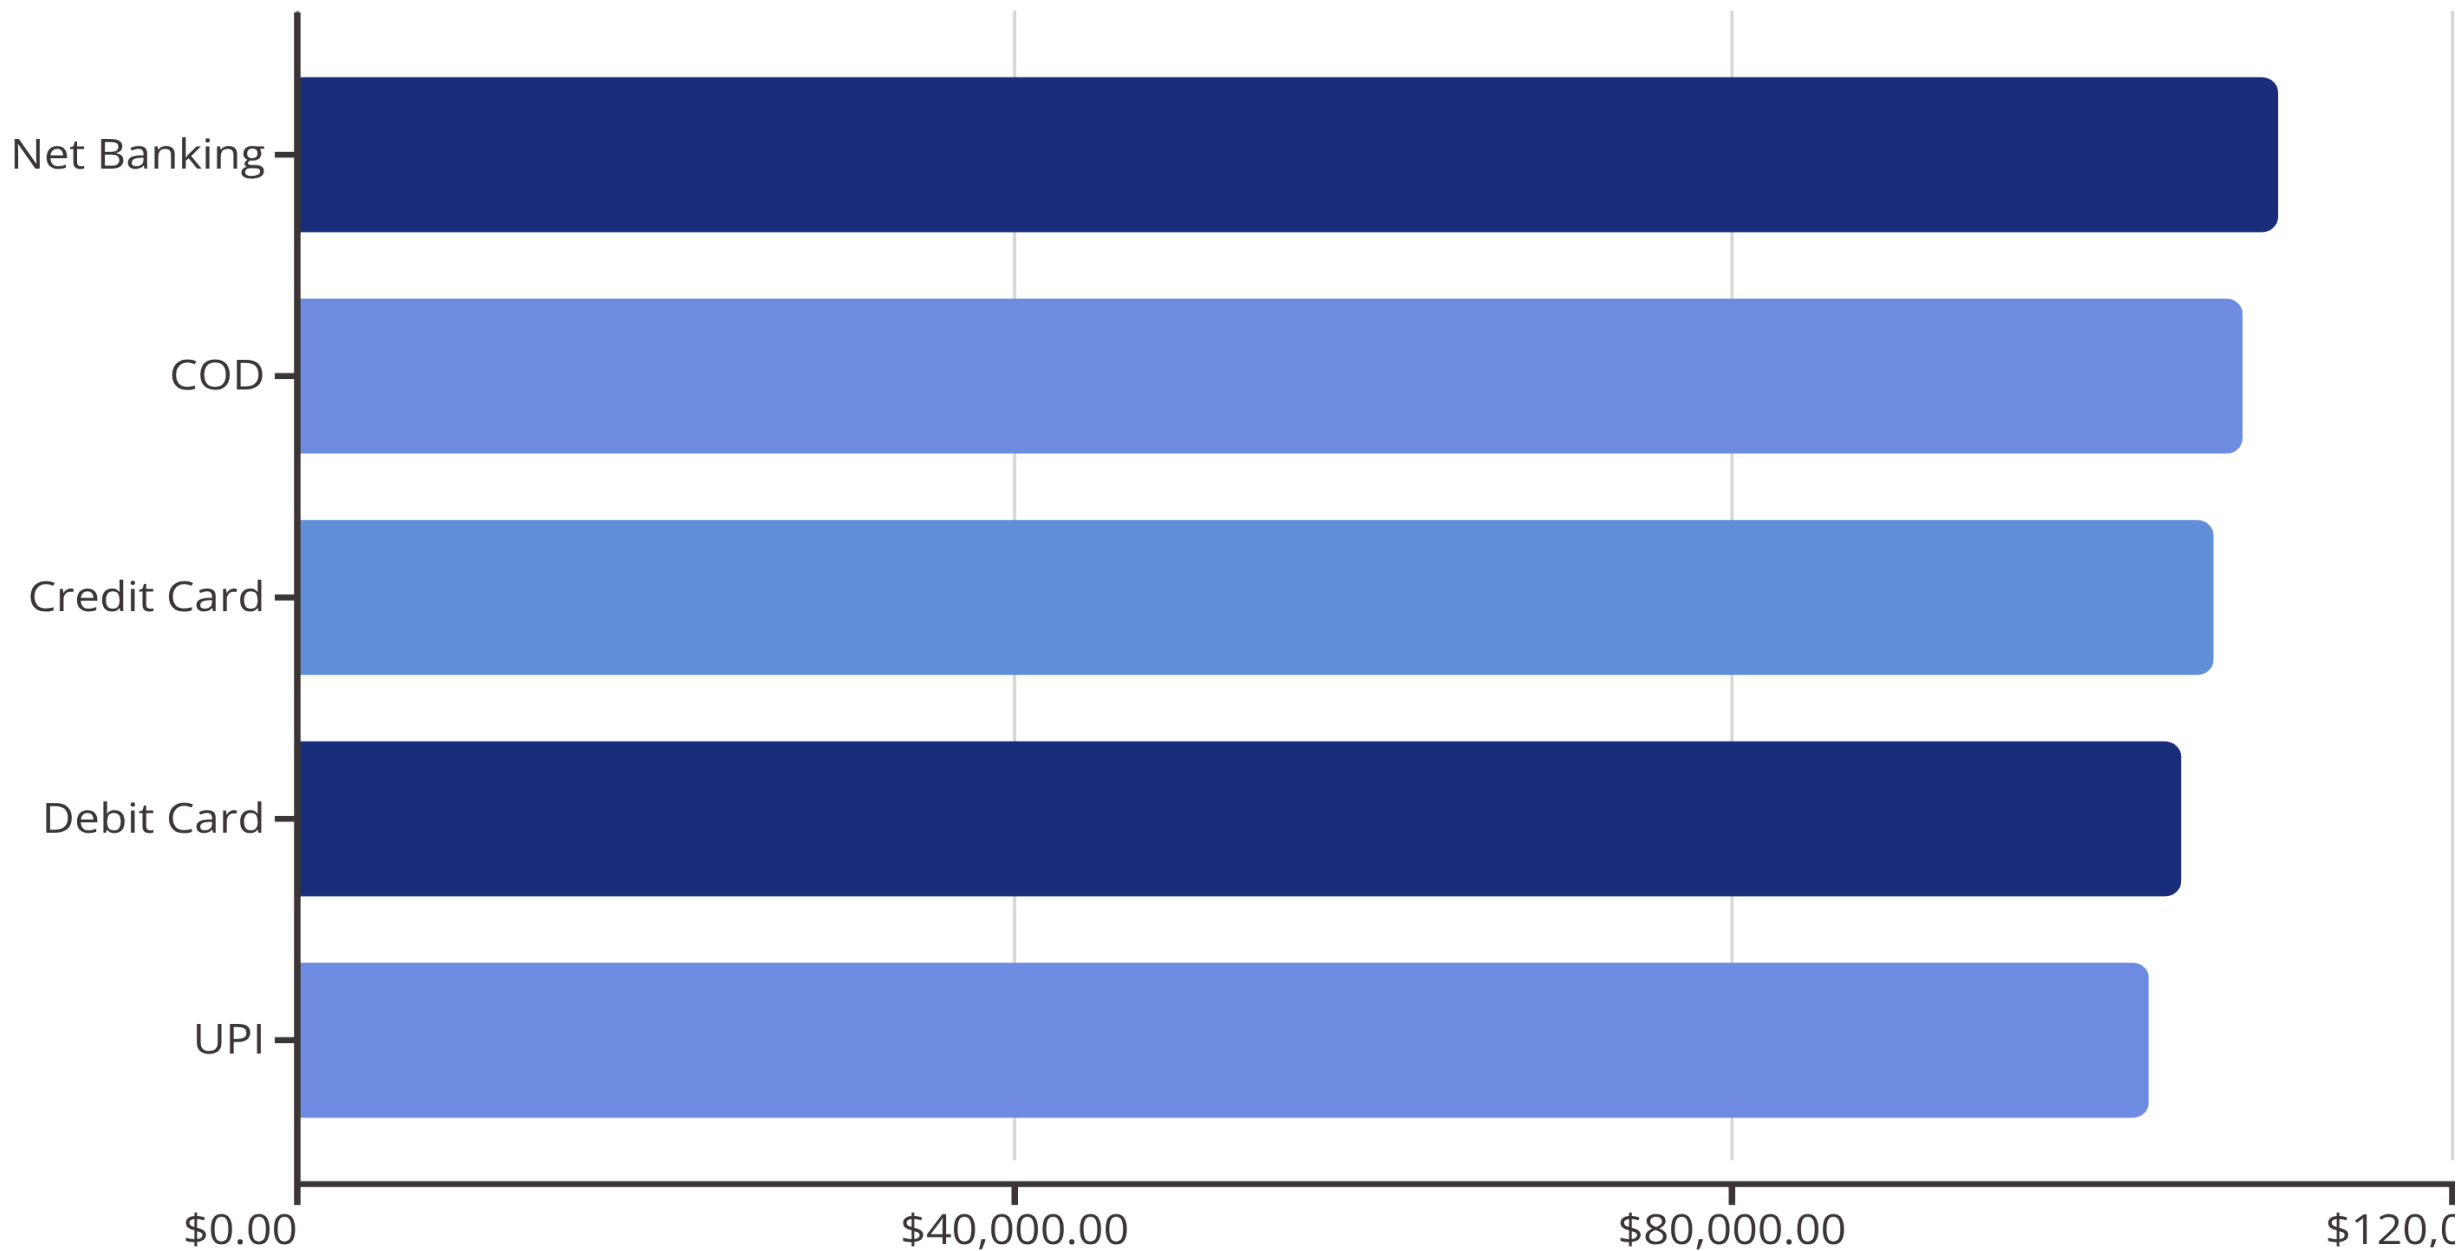

Regional Demand: Top Subcategories

Top 3 subcategories per region by quantity.

1	East - Sofa (112) - Oil (111) - Football (104)
2	North - Camera (112) - Action Figure (109) - Biography (107)
3	South - Juicer (117) - Lamp (102) - Doll (102)
4	West - Sofa (116) - Microwave (112) - Cookware Set (101)

Payment Efficiency

Average Order Value (AOV) across payment modes.

Business Recommendations

Regional Strategy

Increase marketing in South & North for high-value orders.

Discount Optimization

Limit 20% discounts to high-margin categories; target 10-15%.

Inventory Allocation

Focus "Sofa," "Rice" in North; "Laptops," "T-shirts" in South.

Payment Incentives

Promote Credit Card & UPI with cashback for higher AOV.
